Adjustable Stop Banner

www.safetmate.com

Thank you for purchasing our durable coated nylon Stop Banner. It presents an imposing visual barrier. The recognizable STOP symbol, color combination and triangular shape have proven to convey a strict message. When correctly installed, it will effectively deter wandering residents from entering restricted areas.

Your banner is fully adjustable to span openings up to a 60" wide. Two or more can be easily joined to span wider openings.

We suggest installing the banner at a height of approximately 42" from the floor with the adhesive backed Velcro provided. We have installed grommets on the straps so that the banner can be permanently mounted ON ONE SIDE ONLY in cases where residents are prone to removing and walking off with such items.

Care Instructions

The banner and straps are machine washable. **DO NOT PUT IN DRYER.** Line dry. The banner can be pressed. Place cloth between iron and banner. Press on low heat setting.
